PICK UP YO' FEET

Pick up yo' feet; don't shuffle along!
Raise up yo' head; start hummin' a song!
Look with a smile at folks what you meet;
Lift up yo' head, cheer; pick up yo' feet!

Raise up yo' thoughts; look up at the sky!
Lift up yo' voice, sing "Hebben is night!"

Sing all do glooms back what dey belong!
Lift up yo' feet, an' raise up yo' song!
Stick out yo' chest, an' throw out yo' voice!

Put back yo' shoulders; praise an' rejoice!
Join dat joy chorus; make it complete.

Lift up yo' heart, and pick up yo' feet!

RURAL PUPILS IN LOWER GRADES TO PROFIT BY NEW SCHOOL BILL

In at least fifteen hundred one-room schools there are high school pupils to be found in Grades IX and X, along with the pupils of elementary grades. Much time that is needed with the junior pupils is being given to those more advanced. The little district school is primarily an elementary school. This is where the emphasis should remain. Under the contemplated set-up adjoining districts could co-operate in providing secondary education. A mere handful of pupils in each district would no longer make demands on the teacher's time at the expense of the majority.

The teacher has about three hundred minutes each day to attend to the needs of the children in all grades present. Probably one-half of this time should be given to class instruction. This leaves one hundred and fifty minutes for the supervision of the work of individual pupils, an average of five minutes per pupil per day. This is all too little. The presence of a few high school pupils in a room robs the little tots of the time that should go to them and their difficulties.

It is true also that many teachers who instruct high school classes in one-room schools must devote much of their evening study to the preparation of high school subject-matter. This time should be spent on preparing work for and correcting assignments of the elementary pupils.

With the divisional boards engaging the teachers there will be closer scrutiny of qualifications of teachers. The capable will have less difficulty in securing schools, but the less efficient will not welcome the change. The pupils are due to win.

Mr. and Mrs. Bishop Wilson and Mr. H. Bosenberry were up from Pincher Creek Wednesday night to see the Kimberley-Coleman hockey game.

Under auspices of the Vici Group of the C.G.I.F., an entertainment will be staged in the auditorium of the United church on Wednesday night, February the 26th. The programme will include a short play, entitled "Too Much Matrimony."

BONSPIEL HERE WEDNESDAY AND THURSDAY

The bonspiel for the Studebaker and Pontiac cups will be held here on Wednesday and Thursday of next week. Rinks from Bellevue, Coleman and Blairmore will take part. Holders of the cups at the present time are the Key rink, of Bellevue, of the Pontiac, and DeStobel rink, of Coleman, 1935 winners of the Studebaker.

THE PASS EIGHTEEN YEARS AGO (Blairmore Enterprise, 1917)

Sept. 7.—Anton Dypolt, son of Mr. and Mrs. Emil Dypolt, of Frank, is believed to be the first Bohemian to have died on the fields of Flanders. At the residence of Mr. and Mrs. Neil Darrach, Alton Apartments, Calgary, on Wednesday, September 5th, the marriage took place of Katherine Isabel, formerly of the Blairmore teaching staff, to Mr. J. Johnston Murray, C.P.R. agent of Frank.

Word has been received at Lundbreck of the arrival of a baby to Dr. and Mrs. A. C. C. Johnston, in England. Dr. Johnston went over with the 50th Battalion.

Miss Sara McCollom arrived Sunday from New Brunswick, to take up duties as teacher here.

The marriage of Miss Rose Paula Hansmer, second daughter of Mr. and Mrs. C. Hansmer, of Lundbreck, to Thomas Richard Duckworth, took place at Wolseley, Sask., on August the 9th.

Sept. 14.—Herbert Barlass, of Bellevue, made a trip to the coast this week.

W. J. Cole started a picture show in the Workers' hall at Bellevue on Saturday. He intends to build it there shortly.

Elias Litherland, of Bellevue, has secured a position as fireman at Drumheller.

Report says Lieut W. J. Fisher has been wounded the third time in the trenches.

T. Ede, solicitor, is suing J. Little for the amount of an old account.

Mr. Comfort, of Bellevue, is negotiating for the purchase of the Crystal Dairy business at Blairmore from Lank Bros.

Emil Trono, of Bankhead, was united in marriage to Miss Balma, of the same place, on Thursday of last week. They stopped off in Blairmore on Tuesday to visit Mr. Trono's brother, S. L. Trono, and continued on to Banff, via Lethbridge and Medicine Hat on Wednesday.

Charles Zemek has taken over the meat market business at Frank, formerly conducted by Tony Plack.

Sept. 21.—Sergeant James M. Carter and Pte. Joe DeGroote returned from overseas on Thursday morning and were accorded a great reception by the people of Blairmore.

Thomas Shehan, of Beaver Mines, has arrived home from France.

The marriage of Ovidio John Zatti to Miss Marie Emeline Rosse, second daughter of Mr. and Mrs. Michel Rosse, was solemnized at Frank on Tuesday by Rev. W. T. Young.

Mayor W. A. Beebe was in Calgary yesterday attending the convention of Alberta municipalities.

Rinaldo Pozzi is erecting a residence on Woodward Street. Cars are already on the spot for the promised attack.

Sept. 28.—T. M. Burnett has decided to quit business in Bellevue, to be succeeded by Johnson & Cousens. The new firm announce they will be open for business in the Farmer-Whiller building on October the 1st.

British Columbia goes dry on Monday next. By that time it is expected the bootleggers will be ready to open up full blast.

Mr. and Mrs. M. Trono and children, of Toronto, were visitors here this week with the former's brother, Mr. S. Trono.

SUN LIFE REPORT REVEALS STRENGTH

Montreal, February 10.—Definite signs of an improvement in general business conditions can be gathered from the 65th Annual Report of the Sun Life Assurance Company of Canada just released for publication by Arthur B. Wood, President and Managing Director. The statement reflects the strength and stability of life insurance, a voluntary cooperative movement which for generations has stood every test.

Life insurance companies' annual statements, always considered barometers of general business conditions in the territories they operate in, have been accurate indicators during the depression and since 1933 have shown, in no uncertain terms, that general business is making headway.

The Sun Life's financial statement for 1935 shows still further strengthening and improvement, just as the report for 1934 showed progress over 1933, the year the depression reached its low point.

The insurance executive confined his remarks largely to the highly satisfactory financial statement presented by his company, but in passing spoke of the "biggest" of life insurance and how it had grown to be of really staggering figures, and for this reason was apt to be classed as a so-called "big interest" in a sinister manner. Life insurance is proud of its size because it means that million of people are taking advantage of the greatest cooperative enterprise in the history of mankind—a scientific development that has stood the test for generations.

Mr. Wood, in commenting on general business conditions in the countries where the Sun Life operates and the prospects for 1936 in the United States, Great Britain and Canada, the three countries where the company secures most of its business, stated that the world is slowly but surely emerging from the depression and that although many uncertainties as to the future still exist and that there will be setbacks from time to time, the significant factor is—that all those indices by which business improvement is judged clearly indicate that fundamental economic forces are gradually having their effect in bringing about recovery and that this continent is steadily approaching normal conditions.

MANNING AND ABERHART DISAGREE

In a Sunday evening service of the Edmonton Prophetic Bible Conference, Hon. E. C. Manning, provincial secretary, said "Man can do nothing to cure wars and depressions and other world disasters. There always have been such disasters on earth and we can do nothing to prevent them; that lies with God."

A few hours before, Aberhart said in his Calgary broadcast: "I do not wish to remain in power, if I can't break the back of this depression. We'll break it or it will break us." Aberhart has either taken over the work of the Almighty or believes he is His right hand man. We think he and Manning would do well to get together on their Sunday broadcasts, and safeguard themselves from again speaking at cross purposes.—Drumheller New Review.

Standing around bank corridors and begging is not tolerated in the cities. Why should it be in the smaller centres? It has been tolerated for far too long a time in the Pass towns.

Eighteen cars were derailed as an eastbound freight train left the rails near Kipp on Tuesday morning. As a result of the accident, Tuesday morning's passenger train was eleven hours late in reaching Blairmore.

WEEKLY NEWS LETTER FROM EDMONTON (By T. B. Windress)

Edmonton, Alta., Feb. 10.—The big news during the week has been the opening of the 18th legislature of Alberta, and, while the daily newspapers have carried very complete stories of this important event, there are thousands of readers of weekly papers who never see a daily, or only seldom, and so it would be difficult to write a summary of the news without referring to it. Dignity, decorum and impressiveness were the outstanding characteristics of the session opening ceremonies. Seldom, if ever, has this picturesque event been so full of solemnity. Despite the fact that the period of official mourning for the death of His Late Majesty, King George V, made the ceremony take a sombre tone, there was plenty of interest. While cannon boomed their 15-gun salute to the king's representative, His Honor Lieutenant Governor W. L. Walsh, the proceedings began. The latter, before weather made it advisable for the military display to be held inside the big rotunda of the legislative buildings, where the guard of honor, 80 strong, lined two sides of the floor, in two lines of scarlet and khaki against the background of marble pillars and floral decorations. In the crowded chamber, where every inch of space was occupied, the usual attendance of guest spectators on the main floor was a sombre black, instead of the customary brilliant colors in costumes. Only the red tunics of the I.C.M.P. officers gave a splash of color to the scene. Members of the legislature wore black ties and dark suits and the proceedings were a bit unusual because of changes necessitated by the demise of the crown head. The election of a new speaker also gave a touch of novelty to the occasion. Hon. H. C. Tanner, M.L.A., was the government choice and, after his election, took the new chair on the dais. The only failure in the programme was that the Speaker's new uniform had not arrived from the English tailor who made it. He had to wear a substitute robe provided by a judge of the supreme court. The unfortunate robe arrived Saturday, but without the aid, and an order had to be sent to a local tailor for a pair to be ready on Monday.

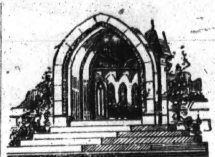

Friday the legislature took up its regular work with the first shots being fired in the debate on the speech from the throne, which the lieutenant-governor read Thursday afternoon. Two fine speeches were made by Hon. E. C. Manning, M.L.A., of Pincher Creek, and Mrs. Edith Rogers, of Ponoka, who defeated former premier, Mr. Brown, in the election. These speeches in moving and seconding the reply to the throne speech were well received by all sides of the house. Following Mrs. Rogers, W. L. Houston, Liberal leader, took up the evidence in the first attack of the Social Credit government this session. He demanded that the resignation made in the election by Premier Aberhart, be implemented during this session, or else the resignation of the government should be presented to the lieutenant-governor. He declared that a single member of the government party believed the promised basic dividends of \$25 monthly would be paid during this session. Taxpayers of the opposition became clear with Mr. Houston's speech. He only spoke about twenty minutes, and it is said that D. M. Duggan, Conservative leader, who is expected to speak later, will only occupy a few minutes also.

Social Crediters, who protested amicably against Mr. Houston's challenge to bring on the Social Credit legislation, and if it would not increase taxation and add to the public debt, the Liberals would support it, pointed out that Mr. Houston was "only playing politics." They say it is, of course, impossible to pay dividends until the needed legislation is on the statute books, and it is impossible to put it there until the legislature has met. The speech from the throne promised a measure leading to the establishment of Social Credit would be introduced to the legislature.

The legislature passed a loyal address to His Majesty, King Edward VIII, who occupies a special place in the affections of the people of Alberta by reason of his residence in this province, Premier Aberhart said. The resolution was seconded by Liberal leader Houston, and supported by D. M. Duggan, Conservative leader. The house voted on it standing.

On Friday 18 bills were introduced by the government covering a wide range of legislation, most of them being amendments to existing statutes. This indicates that the government means to get its business over with as little unnecessary delay as possible. It is expected that the budget will be ready to be brought down within two weeks. Last session the house discussed the throne speech for three weeks and the budget for two weeks. This week serves as a hint of how the present government is bent on wasting no time. Of course the great gain of orators have scarcely been opened a small bit yet, and when the enthusiastic members get going the government may not be able to stop the flow.

The session is proceeding all this week, with the usual recess Wednesday, and it promises to be the most interesting one Alberta has seen. It is unique in being the only Social Credit legislature in the world. There is wide interest in its doings in the United States and Great Britain. It is impossible to mention all the things that happened in connection with the big event of the week in a short article.

"Serve the Church that the Church May Serve You."

BLAIRMORE UNITED CHURCH

Rev. Albert E. Larke, Minister

Services Sunday next:

11 a.m.—SENIOR SCHOOL and ADULT BIBLE CLASS.

2 p.m.—JUNIOR SCHOOL.

7.30 p.m.—PUBLIC WORSHIP.

The I.O.D.E. will attend in a body to commemorate Founder's Day.

ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday next:

10 a.m., Sunday School.

11 a.m., Morning service.

THE SALVATION ARMY

Coleman, Alberta

Lieutenants Fitch and Pierce

You are invited to attend the services on Sunday at the Army.

Directory call at 10.30 a.m.

Sunday school at 3 p.m.

The Sunday night service at 7.30 will be unique in that it is a dedication service. You are very welcome.

Special Notice—Your old friend Major Acton, now the Commander of the Army's forces in Alberta, will spend three days in the Pass, Monday, Tuesday and Wednesday, February 24 - 25 - 26.

Special services as follows: Monday, February 24th, great rally for Young People in the Pass, at 7.30 p.m. Boys and girls; don't miss this. Tuesday, February 25th, meeting for boys and girls at 4 o'clock. Come right after school. Meeting for adults at 7.30 p.m. Wednesday, February 26th, annual prize-giving and programme for the Sunday school. Major Acton will be chairman for this special event. Keep these meetings in mind. Come and bring your friends.

title, but next week there will doubtless be a variety of interest in this news story.

A SQUARE DEAL FOR THE BOY ON THE FARM

Jim Brown is just an average farm boy born and raised in the country. Jim has passed Grade VIII, and together with five or six other boys and girls from the same one-roomed rural school is wondering whether he will continue his schooling or not. Perhaps the parents of one or more of this little group of budding citizens may be able to afford fees and board in the nearby town or city—but for the majority no such good luck is theirs. The best they can do is to have the trustees ask their teacher to "take" a Grade IX next year. These pupils know full well just what this means—sitting without regular teaching or classes and getting what they can from their text books with an occasional helping hand of the teacher who is too busy with the public school grades to afford them sufficient time to make their work interesting and promote their progress. Only the brightest and most persistent of the group thrive under this treatment and Jim soon loses interest and quits school. His education has ended. Such is a picture of the present one-roomed rural school handicap and cannot be otherwise under the present set-up. But what of the future?

Robert Gray, local district manager for Plunkett & Savage Ltd., was a business visitor to Calgary the early part of the week.

Making And Unmaking Deserts

The area known to-day as the prairie provinces of Western Canada appeared on the maps a few decades back under the designation "Great American Desert".

That was a misnomer, known only to a handful of people who wanted to maintain the area as a preserve for fur-bearing animals. The truth was that the great bulk of this large territory was not only not a desert but was covered with a luxuriant turf and a substantial portion of it was the habitat of trees and shrubs.

Like most tribes this verity came to light and thousands of people flocked in, converted millions of acres into farmsteads and proved that the land was good and capable of producing quality grains, grasses, vegetables and livestock in abundance.

After taking possession of this newly-discovered heritage the settlers proceeded to develop it. The sod was turned over, at first a few acres at the time but later, with modern equipment more accessible, they plowed it up by the square mile and grew grain in huge fields. Trees were cut down and every shrub torn out by the roots. Mile long furrows without an impediment was the objective. Prairie sod, except for small reserves for pasture disappeared. Trees and shrubs vanished.

Then came the summer-fallow method of cultivation to give the land a rest from cropping and permit it to store up a reservoir of moisture for a succeeding crop. In this process the land was worked up into a fine tilth—turned into dust, the finer the better, it was thought.

By the time this system had become well established, the humus and root fibre of the original prairie sod was well worked out and the soil became finer texture each succeeding year. Then came the drought, several years of it for some sections, and during this period the high prairie winds whipped the fine dusty soil into the air, drove it hither and yon, piling it up against fences and buildings and covering highways and what pasturage remained.

In some districts the fine soil was swept off down to hardpan and that is the plight of these districts to-day. If these reckless methods are continued, the denuded area will increase in size and unless an extensive program of rehabilitation is followed the time may come when the "Great American Desert" will be a reality instead of the misnomer it once was.

There is abundance of evidence that man can and does make deserts, as witness W. L. Lowdermilk, associate chief of the Soil Conservation Service, United States department of agriculture, who declared in a recent magazine article that the history of civilization "may be interpreted in terms of soil erosion, so direct is the relation between the productive condition of soils and the prosperity of the people."

Mr. Lowdermilk refers to archaeological discoveries demonstrating that the Sahara and Asian deserts, and parts of Palestine, Mesopotamia and the Gobi and North China deserts were once teeming with human life and outlines the process which eventually converts fertile lands into areas of aridity and sterility.

Many students have attributed desiccation and the consequent drying up of streams to the removal of forests. That is only part of the story. The great enemy of the human race is soil erosion which has been associated with the habitations of man since before the dawn of history. The removal of vegetation, whether grass, brush or forest, exposes soils to the dash of rain or the blast of wind, against which they have been protected for thousands of years.

Topsoils blow away or wash away or both. Unprotected sloping lands are usually bare to hard and tight subsoils which drain off the water as from a tiled roof. The perennial streams, deprived of their reservoirs of supply, dry up except in rainy seasons, when they become torrential floods and sweep boulders and debris down the slope to deposit them on otherwise fertile lands. Then starving wild or domestic herds clean the devastated areas of all palatable vegetation, only to reduce the effectiveness of beneficial rains and accretionate aridity.

Truly, a dismal outlook, but fortunately residents of the western provinces and their governments are becoming aware of the danger and, for the first time serious efforts are being made to stem this waste and prevent ultimate disaster. Reference to the work and program of the Federal conservation committee in this connection was made in this column recently. Provided there is widespread knowledge of the causes of soil erosion and a lively appreciation of the plight to which it may ultimately lead, there need be no fears that plans will be rendered abortive for lack of co-operation on the part of the general public. For, if deserts can be made by man they can also be restored to fertility by human agencies working co-operatively but it is a slow process and an uphill job.

Included in the several recuperative agencies which the committee hopes to press into service to repair the damage already done and prevent further serious loss is a tree planting program. This year, five million trees are to be distributed free to farmers in the three provinces from the Indian Head experimental forest. While five million may sound like a lot of trees, they will only make a small contribution to the problem. Many more will have to be planted to be effective on a scale proportionate to the problem to be solved.

Retired After Long Service

Registrar In Wales Held Position For Sixty Years

Sixty years as registrar of marriages for the Holwell district is the record of John Lloyd, of Haulfryn, Wales, who has just retired, in his ninety-first year. He claimed to be the oldest active government official in the world. On one occasion he officiated at the marriage of a great-grandchild of a bride and bridegroom whose wedding he witnessed in his early days as a registrar.

According to the most reliable historical records, approximately 13,000,000 human lives have been lost in earthquakes.

Start Lonely Task

Men Building Fog Signal Off Coast Of Scotland

Five men have started on the loneliest task in all Britain. They are building an automatic fog signal beacon on the Stob Gorm, a rock in the Atlantic two miles north of the island of Croil, off the coast of Scotland. The men are living in a hut on the rock, and may be marooned there for many weeks.

In recent French army manoeuvres motorized troops were judged superior to cavalry.

In Java, thunderstorms are almost a daily occurrence.

Great French Flying Boat

Thirty-Ton Craft May Be Used For Ocean Service

Residents of the British West Indies are hoping for a sight of the giant new French flying boat, Lieutenant de Valaseau Paris, when it visits France's colonies.

The 75-passenger ship, built for experiments in trans-Atlantic mail and passenger flying, will pass over the Leeward and Windward Islands in its trip, celebrating the 300th year of French rule in Guiana and the Indies. It will call at French Guiana, Martinique, Guadeloupe and French-speaking Haiti.

Taking part in the anniversary trip also will be five other aeroplanes, with the Emil Berlin, France's largest cruiser-minelayer, and the Surcouf, world's biggest submarine. They will be on hand for the inauguration of naval bases at Martinique and Guadeloupe.

Chief interest centres in the great flying boat. Powered with six motors, the huge craft has a wing spread of 160 feet and is 103 feet long. It has a cruising speed of 145 miles an hour. Its luxurious interior includes a large lounge, eight double first-class cabins, second-class accommodations, a kitchen, bathrooms and even a bar. Most of these fittings have been taken out for the present trip, but they are being shipped across the sea to be reinstalled at Martinique.

The 30-ton craft, manned by eight officers and several mechanics, has been designed for cross-ocean flying by way of the southern route. If experiments prove successful, France hopes to make her the first unit in a service between that country and the United States.

The Largest Exhibitor

Irish Free State Heads List At British Industries Fair

The British Industries Fair, the great "shop window" of the British Empire, is being held in two sections this year as usual, and opened in London and Birmingham simultaneously. A dispatch from London stating that the Empire country sending the largest number of exhibitors is the Irish Free State, Canada coming next.

And the Irish Free State has refused to proclaim King Edward VIII, although President De Valera did send a message of sympathy.

The Irish Free State does not want to swear allegiance to the British throne. But it does want all the advantages of belonging to the British Empire.

If the British bore grudges they would say that until King Edward is proclaimed at Dublin Castle, no Irish Free State goods will be admitted to the British Empire Fair. But they will not do that, and the Irish are likely to do a great deal of business at London and Birmingham.—St. Thomas Times-Journal.

Bodyguard To King Edward

Chief Inspector Of Scotland Yard Named For Post

The personal bodyguard of King Edward VIII, will be Chief Inspector David Storer of Scotland Yard, former school teacher who acted in that capacity for Edward as Prince of Wales and accompanied him on his tour of Argentina.

Inspector Storer took over the duties a few years ago on the death of Chief Inspector Burt, who had performed them for ten years, "shadowing the Prince all over the world."

The new king, like his father, always has shown the greatest consideration for the man appointed as his personal "shadow". King George always treated Inspector Hill—at present in command of Buckingham Palace police—like a friend.

Superintendent Green, personal detective of the late King, will now act in a similar capacity for Queen Mother Mary.

Luxury For Women Miners

Women workers of the Minto coal mine at Lochgelly, Scotland, are to enjoy the luxuries of \$75,000 pithead baths, which have just been built. In brightly decorated rooms they are to enjoy spray baths, rest on divan, dry their hair before electric fans and have working clothes air-dried and cleaned ready for the next day's work.

Illuminated Dance Floor

Dancing on waves of light will, in effect, be possible when a new luxury hotel at Durban, Natal, is completed, its open-air ballroom a floor of glass. It will be illuminated from beneath in such a way as give the effect of light waves passing through the glass.

New York state contains 49,203 square miles.

Conservationists Meet

Says Sanctuary Idea Originated In Saskatchewan

A plea that conservationists use their voting strength in political elections was made to the North American Wild Life conference at Washington by Jay N. "Ding" Darling, former chief of the biological survey.

More than 1,500 games and fish authorities heard Darling's address at the conference's opening session after greetings were read from President Roosevelt, Prime Minister MacKenzie King of Canada and the president of Mexico.

Mr. King's message, read by L. B. Harkin, Canada's commissioner of national parks, said:

"The treaty between the United States and Canada for the protection of migratory birds indicates the inter-relationship of interests between our countries in that phase of wild life conservation."

"Following the policy established by the treaty, Canada is pleased to join with the United States of America and the republic of Mexico in the present effort to advance the cause of conservation of North American wild life to the end that the full economic and aesthetic possibilities of this great and distinctive resource may not only be enjoyed by the present generation but be handed down unimpaired for the future citizens of this continent."

J. B. Harkin and Hayes Lloyd represented the Canadian government and Senator Juan Zinsner spoke for Mexico.

Lloyd, who is secretary of Canada's advisory board on wild-life protection, told the conference the Dominion was making great progress in conservation.

"The sanctuary idea in North America," he said, "originated in Canada with the establishment in 1887 of Last Mountain Lake sanctuary in what is now the province of Saskatchewan, because it was recognized the invasion of agriculture would replace much of the interesting and valuable waterfowl life of the prairies, unless such bird safety zones were established."

SELECTED RECIPES

COFFEE CAKE

Temperature: 400 degrees F. Time: 25 minutes.

- 1 1/2 cups bread flour
- 1/4 cup "Crown Brand" Corn Syrup
- 1/2 cup milk
- 1/2 cup sugar
- 2 teaspoons baking powder
- 1/2 teaspoon salt
- 1/4 cup shortening
- 1 egg

Beat together the flour, sugar, baking powder and salt. Cut in the shortening with a dough blender. Beat the egg until light, then add the milk and the "Crown Brand" Corn Syrup. Add to the dry mixture and stir just as little as possible. Pat into a 8-inch cake pan which has been greased with Mazola. Spread the top with melted butter and then sprinkle on lightly the following mixture:

- 2 tablespoons butter
- 2 tablespoons "Crown Brand" Corn Syrup
- 2 tablespoons Benson's Corn Starch
- 1/4 cup cracker or cookie crumbs
- 1/2 teaspoon cinnamon

This crumb mixture should be mixed before putting in place on top of the batter. Bake the Coffee Cake in a hot oven and serve hot.

Protest Tax

Appeal Will Be Made To Privy Council In England

Appeal will be made to the privy council to determine the constitutionality of the Manitoba government's two per cent. wage tax as it applies to federal government employees in that province, it was learned in Winnipeg. Decision of counsel for the civil servants to carry the appeal to the Empire's highest tribunal follows the recent adverse decision handed down by the supreme court of Canada. It is believed the case will be argued in London next June.

Colorful Styles For Men

Colored dinner coats, pastel champagne coats, royal blue evening capes and Algerian striped suitings were featured among the 1936 styles for men which were released when hundreds of delegates from all over Canada and the United States gathered in Toronto for the annual international convention of the Merchant Tailors' Association.

Death Ray Harnessed

Will Now Be Assigned To The Task Of Saving Human Lives

The most potent death ray yet devised by man was assigned to the task of saving human lives.

Tests of its power in this respect were prepared in the physics laboratory of the University of Illinois. The ray, a beam of neutrons 14 times more deadly than X-rays, was to be shot from a scientific "gun" now being assembled under the direction of Dr. P. G. Krugere.

Human approach within 50 feet of the "gun" was unsafe because of the speed with which the ray destroys the white corpuscles of the blood. All shields, including those normally used for protection against X-rays and radium, are vulnerable to the deadly beams. The "gun" must be operated by remote control from a distant switchboard.

Experiments have shown, Dr. Krugere said, that the rays reduce the white blood count from 8,000 to 300 or 400.

Although this means almost certain death to normal humans, the physicist asserted, it may mean just the opposite to victims of leukemia, the disease in which white corpuscles grow so fast they kill off the life-bearing red ones.

Another possibility, he said, was use of the ray to kill the wild growth cells of cancer and Hodgkin's disease.

No Truth In Stories

King Edward Cannot Visit Dominions In Near Future

Stories of a possible visit in the near future to the Dominions of the king or any members of the royal family should be taken with a good deal of reserve.

To begin with, the court is in mourning for nine months. Then, the coronation will follow. Whether the king will go to India for a coronation ceremony in Durbar is believed to be quite undecided.

Sooner or later, it is likely the Duke of York, heir presumptive, will make a tour of the Dominions as his father when he held the same title.

"The Bedouins," says a returned traveler, "are as arant thieves as ever." Still silently stealing away.

Kipling Knew His Bible

Was Familiar With Subject Matter Of Every Chapter

Two of the greatest hymns in the church hymn book of the protestant churches are "Lead Us Not Into Temptation" and "Hark! The Herald Angels Sing." They are the common property of all the churches. Kipling wrote one, Wesley the other. Kipling knew the subject matter of every chapter in the Bible. These great Englishmen can be broad in their tolerance of many errors, yet they never get far from the Bible. In reading King and many of the tales about the soldiers in India, it would be hard to think of their author as a Bible student. He must have carried a Bible with him in all his wanderings through India. What a lot of young men throughout the country and the United States would think it useless to read. But the young men of England who have been well taught, who can see their country as the defence against the inflow of barbarism that threatens the whole world, love the Bible and keep it near them.

Colonization

Four plans of colonization in Saskatchewan, financed by British capital, have been outlined to the provincial government by a delegation of citizens from Melfort and Wolseley.

ARE YOU TROUBLED WITH NERVES?

Do you find it hard to go to sleep at night? Do you feel poorly rested in the morning? "Jumpy" all day, and "dragged" by evening?

Then take Wincarsin. Here's a delicious wine, not a drug, that soothes nerves as nothing else can; that helps you quickly to sleep and floods your whole being with vibrant new energy.

Wincarsin brings you all the valuable elements of grapes combined with the highest grade beef and guaranteed meat extract. Almost as soon as you begin taking Wincarsin, you feel wonderfully better. This is because Wincarsin enriches your blood, soothes your nerves and creates lasting reserves of strength and energy.

Over 20,000 medical men have proved in practice the value of Wincarsin in cases of juniper nerves, insomnia, anaemia, debility and general indigestion. Get Wincarsin from your drug store. Agents: Harold F. Nichols & Co. Ltd., Toronto.

STOP THAT COLD IN A HURRY WITH

Grove's

EXHAUSTIVE BROMO QUININE

You can't be careless with colds. They can quickly develop into something serious unless you take prompt action. A cold like Grove's Bromo Quinine. Grove's has what it takes to stop that cold quickly and effectively. Ask Dr. Duggan. Ask for Grove's. They're in a white jar.

SELECTION OF THE NEW SPEAKER MEETS CRITICISM

Ottawa.—Conservative Leader Bennett made Casgrain's political history when he shattered the traditional peaceful formality of the opening of parliament by criticizing the selection of Pierre Casgrain as speaker of the House of Commons.

The pomp and ceremony, subdued this year because of the death of King George, was eclipsed, by the scene in the House of Commons. The Conservative leader accused the new speaker of attempting to diminish more than 120 employees of the house summarily and without cause. He said Casgrain's conduct could not be condoned and would serve as a warning to opposition members of his political partiality and unfairness.

The former Liberal whip was elected speaker without a recorded vote, after the Conservative leader gave notice he would seek investigation of the ceremonial episode, including the part played by Arthur Beauchamp, clerk of the house.

Lord Tweedsmuir officiated for the first time as governor-general, making the speech from the throne which forecast important bills to be presented this session.

At 3 o'clock the formal ceremonies were held. The governor-general arrived with a guard of honor and was saluted by an artillery band. In keeping with the national mourning over the death of King George, the scene in the red-walled senate chamber was drab in contrast to other years.

It marked the return to power of the Liberal leader and his followers who had been in opposition nearly six years. There are so many Liberal members in the new house they overflow into seats, normally occupied by the opposition, crowding Conservatives, members of the Social Credit group and the Co-operative Commonwealth Federation into a relatively small corner.

Premier Mackenzie King sponsored the motion to elect Speaker Casgrain after recounting his long association with the house and stressing his qualifications for the position.

It was not usual for speakers to be opposed upon their nomination, Mr. Bennett said. A rule they could be elected unanimously but there were precedents for their opposition. It had been said a former chief whip made a good speaker because he was familiar with the house. In a general way he agreed with the statement but there were arguments to the contrary.

"I regret," Mr. Bennett said, "to have to say I am opposed to the election of Mr. Casgrain as speaker." It had been known for some time Mr. Casgrain was to be speaker, Mr. Bennett said. With that knowledge going out unofficially he had no fault to find.

On January 28, after the press announced Mr. Casgrain would be speaker, Mr. Bennett said, the sergeant-at-arms sent letters to more than 120 employees of the house telling them their services would not be needed after the end of January.

"Those instructions," said Mr. Bennett, "came from Mr. Casgrain. He had the same right to give those instructions as the youngest and humblest member of this house."

It was expressly provided by the written law of parliament, said Mr. Bennett, that no employee of the house could be relieved of his office unless a complaint was made against him and he was given an opportunity to state his defence.

It was a painful time for him to call attention to this situation said Mr. Bennett. But he asked if a man who was capable of such an arrogant disregard of the privileges of the house could have confidence of men on the opposition side.

In the pressure of party politics governments often had to do things they did not like. He was proud, however, of the prompt action taken by Mr. King to halt the dismissal.

Mr. Bennett said he wished to be fair to the prime minister and to the government. Mr. King deserved the gratitude of all members.

The clerk of the house was reported as having made statements which demanded an inquiry. The whole matter would have to be investigated by a committee of privilege.

If Mr. Casgrain were elected, said Mr. Bennett, he would be in a peculiar position when he had to put to the house a motion to refer his own conduct to a committee.

"Can we condone the action of Mr. Casgrain?" asked Mr. Bennett. "I cannot although I am asked to do it. I cannot condone a clear violation of the law."

A Balanced Budget

Speaker, Tells Of Factors In Britain's Economic Recovery

Toronto.—A balanced budget, a "leading tactic" and "a housing program that builds houses," were named by Henry J. Allen, former governor of Kansas, as chief factors in Great Britain's recovery from economic depression.

Speaking to the Canadian Chamber of Commerce, Mr. Allen compared the Britain he found four years ago with the country from which he has just returned after another visit. "Four years ago we were feeling sorry about Britain—to-day it is a far different story of prosperity based on common sense."

Mr. Allen went to England in the first place "to write about the debt." The first-class unemployment law which from 1911 to 1920 had "built up a great fund of \$700,000,000" had been so decimated by "post-war strikes and Socialist victories" that its deficit stood at \$675,000,000. One-third of the country's manpower were on the dole.

When he went back last year the Keweenaw found prosperity. What happened in the meantime, he said, was that after the nationalist victory in 1931 the decision to balance the budget was made. "The Englishman is old-fashioned; he decided the only way to do that was to take in as much more than was paid out, so taxes were raised a shilling in the pound and expenses cut by \$1,500,000,000. By 1933 the miracle had been accomplished."

Japan Adding To Navy

Planning Biggest Warships In World

London.—The Daily Express featured a sensational story that Japan is planning to build the biggest warships in the world.

The paper, publishing information which was claimed to have been received by a European country not a member of the naval conference from a former naval attaché at Tokyo, alleged Japan is preparing secretly to lay down battleships of 6,000 tons with 16- or 18-inch guns, when the Washington naval treaty expires.

Other units of the reported Japanese navy would be battleships of 15,000 tons, a powerful flotilla of 2,400-ton destroyers, and 3,000-ton submarine cruisers armed with two eight-inch guns.

The British battle cruiser Hood, 42,100 tons, is at present the largest warship in the world.

Says Clash Inevitable

Japanese Commander Sees War Between Britain And Japan

London.—An editorial in the Pacific Ocean between Great Britain and Japan is predicted by Lieutenant-Commander Toshiaki Maru, of the Japanese navy, in his book, "Japan Must Fight Britain," published here.

He predicts a conflict between the two powers is inevitable and says the United States probably will side with Britain.

"Either Japan must stop her expansion in England must willingly give up to her some of what she has or hope to have," says Maru.

"Reversion of the Anglo-Japanese trade agreement might temporarily remove some of the economic difficulties, but that would only postpone the evil day.—A collision is inevitable."

New Faces In Parliament

Majority Of Members Have Not Sat In House Before

Ottawa.—Of the 341 members of the senate and house of commons who gathered in Ottawa for the opening of the 18th parliament, more than 160 were newcomers and the majority of these have never before sat in parliament. In the senate there will be 19 new members, 17 appointed by the Conservative party before the change of government, and two appointed by the present administration.

Ask For Cheese Bonus

Ottawa.—Payment of a bonus to the cheese industry "until such time as prices are profitable to the producer" was urged upon Hon. James Gardiner, minister of agriculture, by a delegation consisting of the executive committee and secretary-treasurer of the Ontario Cheese Producers' Association.

Heads Hereford Association

Toronto.—W. A. Crawford-Frost of Nanton, Alta., was elected president of the Canadian Hereford Breeders' Association at an annual meeting here last week.

Fear Anti-Semitic Riots

Assassination Of Nazi Leader In Switzerland May Cause Trouble

Berlin.—The German government acted to forestall anti-Semitic riots after demanding the Swiss government "discover and prosecute those behind the murder" of Wilhelm Gustloff, Nazi leader in Switzerland.

Gustloff was assassinated in Davos by David Frankfurter, a Jew.

Dr. Goebbels, minister of propaganda, forbade all Jewish cultural organizations, such as theatre groups, to meet until further notice.

In an official communication through its minister to Berne, the Nazi government called the slaying "a serious affair, which, without a doubt, was a political murder."

Jewish circles here expressed fear the killing would spur the anti-Semitic campaign.

RESERVE OPINION ON VALIDITY OF FEDERAL LAWS

Ottawa.—The supreme court of Canada has reached the end of the long constitutional reference, reserving judgment on validity of the last of the eight federal statutes which have been under legal fire for two solid weeks.

It will be a month or six weeks before judgments are delivered and in any event there will be appeals to the privy council in England, either by the Dominion or provinces, depending upon the supreme court's decisions.

It will be necessary for the six judges to study 500,000 words of legal argument before rendering judgment and reading scores of case precedents cited by the opposing counsel. From the beginning to the end there were hundreds of dusty law books read in part.

The eight laws were as follows: Section 488a of the Criminal Code, Dominion Trade and Commerce Act, Employment and Social Insurance Act, Weekly Rest in Industrial Undertakings Act, Minimum Wages Act, Limitation of Hours of Work Act, Natural Products Marketing Act, Farmers' Creditors' Arrangement Act.

In a general way, the provinces attacked validity of each of the eight laws but sometimes not from the same angle or to the same extent. The Dominion argued each statute was constitutional as a whole.

Quebec and New Brunswick attacked every law as an infringement of provincial legislative fields as established by the British North America Act. Ontario and British Columbia attacked only clauses of section 488a and the Trade and Industry Act.

All provinces, including Manitoba, Saskatchewan and Alberta, attacked the laws establishing minimum wages, eight-hour day and weekly day of rest on the basis parliament had no power to invade provincial rights on the pretext of implementing treaty obligations.

HONORED

Lt.-Col. W. A. Bishop, V.C., D.S.O., who becomes the highest ranking air force officer in Canada by virtue of his appointment as Honorary Air Vice-Marshal. The Dominion Government made the award in recognition of Colonel Bishop's war exploits.

Means Increased Revenue

Buying Power Greater In Ottawa When House Is In Session

Ottawa.—With opening of the parliamentary session the population of the capital will be increased by more than 500 and buying power during the session will be increased by approximately \$2,000,000, it is estimated.

Of the 245 members of the house of commons, and 96 members of the senate most of them bring their wives to Ottawa for the session.

Seasonal indemnities paid to members of the house of commons amount to about \$500,000 and the payroll for the cabinet and leader of the opposition totals approximately \$175,000. The speaker of the commons receives \$6,000 annually in addition to his indemnity, and the deputy speaker \$4,000. The speaker of the senate receives \$6,000 in addition to his indemnity.

About \$500,000 is needed for maintenance of the house of commons. Salaries for employees come to \$120,000; committees, \$15,000; clerical assistance, \$100,000; publication of debates, \$65,000; and nearly \$200,000 is needed by the sergeant-at-arms for maintenance including char help, messengers and pages. Ordinary expenses of the senate for the session will amount to about \$162,000.

Will Visit Frontier

Baron Tweedsmuir Wants To See Remote Sections Of Canada

Ottawa.—Within the next year or two Baron Tweedsmuir, governor-general, hopes to visit many of the remote parts of Canada and see something of frontier life in the north and west. Addressing the Canadian Institute of Surveying at luncheon on the first day of its annual meeting, His Excellency said he was a countryman and more interested in the wild places than in cities. He felt most at home when he was with men who lived and worked in the open spaces.

SON MOURNS ABSENCE OF FAMOUS FATHER

Charles Kingsford-Smith, Jr.

Australia's "favorite son" is mourning Charles Kingsford-Smith, Jr., who spent his birthday at home in Sydney picking flowers, possibly in memory of his famous flying father, who is shown below with Mrs. Kingsford-Smith in one of the last photos of the couple taken before the famous heir disappeared on a flight from England to Australia last year.

Blizzard Sweeps Japan

Seventy-Three Lives Lost In Violent Storm

Tokyo.—Seventy-three persons were known dead in Japan and 88 were feared lost at sea as the result of a two-day blizzard which swept over the centre of the island.

It was thought the death list might be increased with word from isolated villages to which communications were disrupted.

A snowslide crushed seven buildings and killed 55 persons at Kusatsu, northwest of Tokyo.

Hope was abandoned for the Unnan Maru, a freighter, with a crew of 45, which sent out an SOS, saying she was waterlogged and sinking. Two steamers which fought their way to Unnan's position found no trace of her.

Taking Position In Russia

Noted Bacteriologist From Canada

Paris.—Prof. Felix D'Herelle, noted Canadian bacteriologist, will leave Paris shortly to become head of the new biological institute at Triflis, named in his honor by the Soviet government.

The scientist, former head of the laboratory of the Pasteur Institute, is discoverer of a bacteria which has proven an effective anti-toxin in combating cholera and bubonic plague.

PROPOSAL FOR A PEACE PARLEY PLAN DEFEATED

London.—The House of Commons turned down a proposal to sponsor a new international peace conference but affirmed its confidence the government will "take all practicable steps to promote international prosperity."

The suggestion for a peace round table came on the motion of George Lansbury, 77-year-old former Labour leader, and was defeated 228 to 131. An amendment, which eliminated the conference proposal but kept the language of the original resolution on the "fulfillment of war" and "grave concern of world-wide preparations for war" was offered by Paul V. Bourgeois, Conservative. It passed 207 to 125.

Viscount Cranborne, parliamentary under-secretary for foreign affairs, said preliminary examination of the problem of an international conference had already been started "but we cannot fix a date until circumstances favor further negotiations."

The last world economic conference, he said, was a failure because the world was not prepared for it. If another were called it would be not only unfortunate but disastrous, he declared.

Lord Cranborne asserted the government had no intention of "banging the door" on the declaration of former Secretary of State, former foreign minister, at Geneva regarding collective examination of economic problems. The general aim was "international agreement which will remove from nations the incentive to pile up armaments and establish the peace of the world on a sure foundation," he said.

Could anyone say the time was ripe for a world conference, he asked. If it were a failure the result would be disastrous.

Lansbury told the house that the danger of war is nearer than at any time in my short life."

"I have never known," said the veteran politician, "when armaments have been of such a devilish description as now or when nations and governments were more feverishly striving to make agreements and pacts for safeguarding their particular interest."

He urged the government to make an effort "along some other line than arming, arming, arming." "Thousands of people in central Europe and Asia are dying of famine and disease," said Lansbury. "Democracy has not triumphed throughout the world. In central Europe it has been rolled in the dust."

Mr. Lansbury's resolution invited the house to affirm "its profound belief in the futility of war, that it views with grave concern world-wide preparations for war, and is of the opinion that, through the League of Nations, the British government should make an immediate effort for summoning a new international conference to deal with economic factors which are responsible . . . with a view of arriving at an international agreement which will remove from nations the incentive to pile up armaments and establish peace in the world on a sure foundation."

RAILWAYS AND MOTOR TRUCKS IN COMPETITION

Hamilton, Ont.—Competition between railways and motor trucks is still far from established on a proven economic basis, Sir Edward Beatty, president of the Canadian Pacific Railway, said in an address before the Engineering Institute of Canada annual convention.

He defended the railways against a charge they had not adequately attempted to meet the competition of road-borne traffic. Conditions in the highway transportation business were unsatisfactory even to those engaged in it, Sir Edward suggested. Because of this, resulting in acute internal competition among the highway carriers themselves, they now were disposed to welcome regulation of rates and services, whereas they had been bitterly opposed to it.

Sir Edward said there had been considerable confusion as to the extent of damage done to railways by highway competition. While Canada's total volume of business increased since 1926, construction and the making of agricultural export commodities totalled only 30 to 50 per cent. of the 1926 figure.

There was no reason to be surprised that carloadings during the period were only about 66.8 per cent. of the 1926 volume, since these were industries for which the railways contributed mostly to railway traffic. It was certain that motor truck competition was not the chief factor in delaying recovery of freight movement by rail.

The public general opinion, he said, that railways were "asleep at the switch" in not intelligently combating highway transportation was wholly baseless.

Railways could not hope to meet at a profit the major part of the expansion of private motor car use and increased importance of tourist business led to improvement in existing highways and construction of a great mileage of new roads. It would have been bad policy for the railways to oppose "this natural development of social economic life."

British Industries Fair

King Edward Will Make First Public Engagement At Opening

London.—The first public engagement of King Edward since the funeral of his father, King George, will be to visit the British Industries Fair.

The fair will be held from Feb. 17 to 28, with exhibits both in London and Birmingham.

Canadian sections have been organized for both the London and Birmingham parts of the fair. Canada also will have a number of buyers at the fair, which is held annually.

Excessive Wire Voltage

Lethbridge, Alta.—Tests following the explosion in the Colquhoun Mine of Lethbridge Collieries Limited December 9 in which 16 miners lost their lives indicated voltage of signal wires was excessive. W. M. Davidson, mine manager, testified here at the judicial inquiry in the disaster.

Resolution Of Sympathy

Dublin, Irish Free State.—The dail eireann, the Irish Free State parliament, voted a resolution of sympathy for the death of King George, the vote, coming more than two weeks after the king's death, was marked by the legislators standing in silence.

Plan Second Super-Liner

London.—The Daily Mail said the Cunard-White Star line has invited designs from four British shipbuilders for a sister ship to the Queen Mary, super-liner of 75,000 tons, which is scheduled to make her maiden voyage across the Atlantic this spring.

Two Dead In Rail Accident

London.—Great Britain was reported in usually reliable quarters to be planning to grant a loan of \$40,000,000 (\$200,000,000) to the Soviet Union under a plan which would provide for payments to the holders of claims against pre-war Russia.

Would Bar Stampede

Vancouver.—The Vancouver Society for the Prevention of Cruelty to Animals has made formal protest to the city's golden jubilee committee in regard to proposals during the Calgary stampede here during the golden jubilee celebrations.

SIGNS OF PROSPERITY

Prognosticators of better times have each their own theories concerning the various factors involved in a return to greater prosperity, so frequently indicated by the upward turn shown in graphs and charts. L. L. Grabill, general agent, baggage department for the Canadian National Railways, also has his theory of returning prosperity, which is supported by tangible evidence. This is the fact that patrons of the railway still leave their purses and handbags on trains and Mr. Grabill argues, with considerable logic, that if money was so awfully scarce why would people be so forgetful as to leave it behind them.

No less than 20 purses and handbags were found on trains of the Canadian National Railways within the past month. Aside from causing temporary consternation, the missing articles, with their contents, were not a permanent loss, however, thanks to the honesty of railway employees, for they were all later recovered at the Lost and Found Department, much to the satisfaction of the passengers.

A STAGGERING COST

The cost of the world war, according to estimates made recently by experts, was \$337,846,189,657. America's share of that cost amounted to \$41,765,000,000. The total cost of the war could have provided \$2,500 cottages on 5-acre plots of land costing \$100 an acre for every family in Great Britain, America, Canada, Germany, France, Belgium and Russia. With what the United States spent in half a year during the war, an automobile and a tractor could be bought for every one of our 6,500,000 farms, with \$600,000,000 left for good roads.—Railway Carmen's Journal.

Forty-two degrees below zero on Thursday morning wasn't so hot!

D. V. Mitchell, Social Credit, was elected to the Calgary city council.

"Caveat Emptor"

—an old Latin phrase, meaning, literally, "Let the Buyer Beware," and expressing exactly the basis upon which most business was transacted in early Roman days—at the Buyer's Risk.

Times have changed since that unregenerate era, fortunately. Most business is nowadays on a far healthier standard. The Buyer—the Customer—is actually protected today by the merchant from whom he makes his purchase.

This policy finds no higher expression anywhere than in the EATON Catalogues. ACCURACY of statement and illustration, regarding every item presented, is a watchword of every EATON publication. Every line of description is checked and double checked to ensure that no misstatement, exaggeration or over-emphasis occurs. Where there is any doubt, the statement in question is tested by scientific analysis and PROVED correct before it is permitted to appear.

It's extra trouble, of course, to take more time and costs more money. But it's well worth while to us to have hundreds of thousands of Western men and women know, as they do, that "It's SAFE to buy from EATON'S."

EATON'S

CONSISTENCY, THOU

ART A JEWEL

The following is taken from the Toronto Saturday Night and will give our readers some idea of how the outside world looks upon the Government dismissals in Alberta.

We are not greatly alarmed about any results which might ensue from the establishment of social credit in Alberta, for we have no expectation that Mr. Aberhart and his government will ever establish social credit there. But we are considerably alarmed about some things which Mr. Aberhart is already establishing in Alberta, and which look to us exactly like the beginning of a very dangerous dictatorship. Mr. H. G. Scott was a magistrate of Calgary until three weeks ago. He had been a magistrate for nearly ten years. He is a Canadian citizen with a lively interest in international affairs, and makes occasional visits to Europe. His first-hand knowledge of European affairs causes him to be in much demand as a speaker before such bodies as the Boards of Trade and Canadian Clubs of the Western provinces. In September he had leave of absence from his Calgary post, and visited Lithuania, where he was attached to the staff of the Chief of the Lithuanian Frontier Police during the historic Memel election. The Calgary Board of Trade, which is by the way one of the best audiences that we have ever had the privilege of addressing, naturally asked Mr. Scott to tell it something of his experiences, and he did so on December 8. On December 12 he received a letter from the Deputy Attorney-General of the Province, who stated that he was directed by the Acting President of the Executive Council of Alberta to inform Mr. Scott "that it is not considered advisable that, so long as you are a judicial officer under salary from the government of the Province, you should give public expression to the views referred to" in a newspaper report of this meeting, "nor that you should address public or semi-public gatherings in respect of matters of political significance such as the international situation in Europe, or the Italo-Ethiopian war, etc." Such expressions, the letter went on to say, might impair Mr. Scott's "usefulness and effectiveness as a magistrate."

Mr. Scott in a very courteous letter informed the Executive Council that he declined to comply with this injunction. The Deputy Attorney-General thereupon wrote to him that his immediate resignation was expected, and Mr. Scott resigned on January 4.

"On Sunday next Premier Aberhart will address the Prophetic Bible conference at Edmonton, on the subject of 'The European Situation as related to prophecy.'"

The above announcement was made over the radio on Sunday evening, February 2nd, from Edmonton.

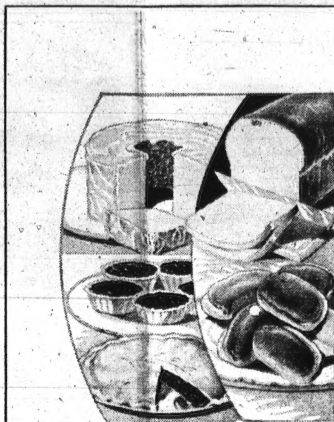

The city of Red Deer has set a mill rate of forty for 1936.

Save your old fountain pens. We are told there is money at the pen point!

The C.C.F. now have an official organ in Alberta, the "People's Paper," successor to the Labor News. Elmer Roper, the force behind the extinct Labor News, is editor-in-chief, and William Irvine, ex-M.P., is assistant editor.

Anyone who ourselves who hold stock in The Enterprise should turn in same at once. We are paying a bonus of three million dollars on stock of issue June 30th, 1920, to be distributed to shareholders after February the 29th.

"The Plaindealer" of Youngstown, Alta., has gone out of business owing to lack of support from the local merchants there. It will therefore be perfectly in order to watch for the business death of what was at one time a thriving and populous town! Every live town NEEDS a newspaper, but they must receive proper support!—Wainwright Star.

Leading Household Science Authorities recommend Quaker Flour and Quaker Method of Easy Baking

MISS A. J. ROE, Household Editor
The Country Guide says:

"I have no hesitation in recommending Quaker Flour and the Quaker Easy Method of Baking as a system that saves time and trouble and gives excellent uniform results."

Quaker Flour
Always the Same Always the Best
FOR BREAD CAKES AND PASTRY

"Baking is no longer hard work for me," says Mrs. G. RILEY, Calgary, Alberta

MRS. G. RILEY

"I use the Quaker Easy Method of Baking with Quaker Flour and I not only save half the work and trouble, but I get much better results in half the time."

And no wonder Mrs. Riley is so completely satisfied with Quaker Flour and the Quaker Easy Method of Baking. Just imagine... no need to knead... you don't have to set the sponge over night and it prevents failures, that are expensive and exasperating.

If you haven't written for your FREE copy of the booklet explaining all about the Quaker Easy Method of Baking, send in the coupon right away and ask your grocer today for your supply of Quaker Flour.

Social Credit candidates in the Red-cliff municipal election were simply wiped out!

We've just been wondering to ourselves if the revamped Albertan could equal the Edmonton Bulletin in partisan portrayal of the legislative proceedings.—Clareholm Local Press.

Mrs. Eva Catherine Egbert, 77, wife of Dr. William Egbert, former lieutenant-governor of Alberta, died at her home in Calgary on Sunday, following an illness of three months.

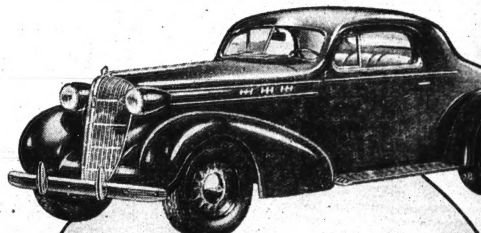

May be it will come to this: If you are the individual owner of an independent newspaper, you'll be taxed. If you own thousands in The Albertan, it will be non-taxable. From what has transpired up to the present, anything seems possible nowadays.

He had to be coaxed to take his twice-daily dose of codliver oil, and a penny was put in a small bank each time he took it. When the bottle was finished, his father solemnly opened the savings bank and counted the contents. "Two and tenpence," he said. "Just the price of another bottle of codliver oil."

Last week we took an inventory of the amount of free space granted by The Enterprise in the last 25 years to boosting for local business folks and their patronage. It reached the enormous amount of \$5,210 at our regular space rates. In return for our kindnesses, many of the business folk we tried to help spent their money unwisely through other mediums.

From Our Own Correspondents

BELLEVUE HAPPENINGS

Miss Beatrice Radford entertained a number of friends at her home on Wednesday evening.

Joe Christie was in Calgary over the week end, attending the Trustees' convention.

Mrs. George Jordan, senior, was called to Camrose late last week, owing to the death of a cousin there.

The home of Mr. and Mrs. J. Price was the scene of a nicely arranged kitchen shower in honor of Mrs. Roy Price (formerly Miss Eda Hlasney). The first part of the evening was spent at whist, honors going to Mrs. O. Haglund and Mrs. V. Mottl. After cards and a dainty lunch, the bride was presented with a well filled basket of beautiful and useful gifts. Games and dancing concluded a most enjoyable evening.

The whist drive and dance held in the I.O.O.F. hall on Friday evening and sponsored by the hockey club, was not very well attended, owing to the severity of the weather. Because of the small crowd, only one prize was given for cards, won by Mrs. George Chiaravano. After supper, about an hour of dancing was enjoyed.

Mrs. F. Utley entertained a number of friends at her home on Friday evening.

Mrs. George Youngberg and Miss Jean were hostesses at a party at their home on Thursday evening, when they entertained a number of friends of Miss V. Bradley, who is leaving shortly for Victoria, where she will enter the Royal Jubilee hospital as a nurse-in-training. Violet was the recipient of many beautiful and useful gifts. Miss Bradley left for the coast on Monday night. Her many friends wish her every success.

Mrs. W. Mills entertained a number of ladies at her home on Friday afternoon.

A very quiet wedding was solemnized by Rev. R. Upton at the United church parsonage on Saturday evening, when Edith, third daughter of Mr. and Mrs. George Hlasney, became the bride of Roy, fourth son of Mr. and Mrs. J. Price. The bride was attended by Miss Evelyn Price, sister of the groom, while the groom was supported by George Hlasney, brother of the bride. The happy couple are making their home in Bellevue, where the groom is employed with the West Canadian Collieries.

Mr. and Mrs. H. Kaye entertained a number of friends at their home on Saturday evening.

Colin Sutherland, of High River, is visiting with his parents, Mr. and Mrs. Sutherland, for a few weeks.

Albert Long, junior, and bride are in town from Regina, visiting with

Mr. Long's parents for a couple of weeks.

Young people took charge of the service at the United church on Sunday. Members of the society formed the choir. Misses Lily Gilroy and Lilian Rhodes acted as ushers; Miss Margaret Innis read the scripture; Miss B. Goodwin offered the prayer, and Miss Hilda Varn announced the hymns. Four other members—Misses Evelyn Price and Ruby Cousins, and Alex. Coastick and Vernard. Truitt, gave short talks on the aims of the organization. A quartette was rendered by four members, and the service concluded with an anthem by the choir.

Don't forget the Valentine's tea and sale of aprons and home cooking, to be held by the Ladies' Aid in the United church parlors on Saturday, February 15th, from 2.30 to 5.

HILLCREST HAPPENINGS

Mrs. P. Salt returned last week from Calgary.

R. Gardiner returned from Calgary, where he had been attending the Trustees' convention.

The cash prize at Cole's theatre on Wednesday night was not claimed. Stan Warriner, of Cowley, has been visiting at his home here.

J. M. Mackie returned to Montreal this week.

A. Amphlett returned Wednesday from a three months' visit to his home in England.

The United church Ladies' Aid will hold their sale of work at the church on Saturday afternoon, February 14th.

The junior baseball club are planning on holding a grand dance on Easter Monday.

COWLEY HAPPENINGS

The annual meeting of the ratepayers of the village of Cowley was held on Monday night. After disposal of general routine business, Lou Lemire was elected on the board of councillors, taking the place of Joe Wilson, whose term of office had expired.

Mrs. Isabel Christie received by cablegram on Monday news of the death of her sister, Miss Elizabeth Slidders, at her home in Scotland. A few years ago, Miss Slidders paid an extended visit to Mrs. Christie, and will be remembered by many friends and acquaintances she had made here at that time.

Vince: "Shall I draw the chicken for you, madam?"

Customer: "No, thank you. Your description of it will be quite sufficient."

Only last year a novice fisherman was seen whipping a stream in this vicinity with a fully equipped fishing outfit, plus a raw potato as bait.

Once upon a time there was a parrot that used to swear terribly. One day he escaped from his cage and wandered into a curling rink, and died of shock.

Little Betty had been served with a chicken wing. After working with it for some time, she said: "Mother, do you mind if I have something else beside the hinges?"

Women talk more at certain times of the day than at others, a psychologist tells us. From eight in the morning until midnight is said to be the peak period.

One of the slickest jokes yet is that of the farmer government giving away the speaker's chair and pants before relinquishing parliamentary buildings.

To meet competition of other than the printed sheet, looks as though the newspapers and printing offices will also have to adopt the "scab" system.

GOD SAVE THE KING

Great nations fade, empires decay,
And noble Kings return—to clay.
Grim war takes toll in many a land,
Stark need and strife go hand in hand.

Yet, still we pray that Peace will come,
That wars may cease, and sons come home.
That guns may rest, and swords be dulled,
The world to "Peace" may yet be lulled.

Our King is dead! Long live our King,
King Edward. May his praises ring
In that—through life he'll stand for Right.

Preserve our Empire's honor bright.
Unite the world in peace sublime,
Cry "halt!" to strife in every clime.
Regard all men as brothers dear,
Where they have need—will give them cheer.

Long life be yours. Your people pray
That you may live, behold the day.
When "Peace and Plenty" shall prevail—

War, strife and want ne'er more assail.
"God Save the King!" your people pray.

While church bells toll in every steeples.
And you—our King—will also pray:
"God Bless our Land, God Save the People."—Amen!

—Eric L. Armstrong, L.N.C.M.

NO NEWSPAPERS IN HEAVEN

(Vide Premier Aberhart)

O think of the home over there!
Where no printers or publishers dare

Put paper to press,
Come Abe, confess
You will miss us—for foul or for fair!

O think of the home over there!
No snooping reporters to stare
When premiers arrive,
No news hounds to strive

For a scoop—sure it seems mighty rare.
O think of the home over there!
Where no editors make it their lair:
There's no printer's devil,
Get this on the level,
The newsmen have all gone elsewhere!

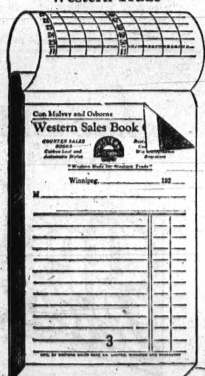

O think of the home over there!
Not going! Come, come, have a care!
There are papers in hell,
Dailies, weeklies as well,
But we hear there is no room to spare!

—Athabasca Echo.

The banker was questioning the negro applicant for a chauffeur's job. "Are you married?" the banker asked. "Nawwah, boss," replied the applicant, "nawwah; Ah makes mah own livin'."

Born in Canada of Canadian parents, schooled in Canada, etc., a Cape Bretoner was tried before a judge recently. As the man claimed he could not speak nor understand English, it became necessary to employ a Gaelic interpreter.

CALGARY DRY GINGER ALE

A UNION MADE PRODUCT OF THE CALGARY BREWING AND MALTING COMPANY, LIMITED

Got complete relief from pains and gas

Fruit-a-tives brought quick relief from indigestion. Mrs. S. Everett, St. Catharines, says, "Indigestion bothered me severely. I was always uncomfortable after meals and troubled with gas. I tried Fruit-a-tives. They soon brought me complete relief and toned me up generally." Fruit-a-tives are really different. They contain extracts of APPLES, ORANGES, FIGS, PRUNES and HERBS. A part of nature they act naturally to help all organs function in a normal healthy fashion. Their tonic effects have brought lasting good health to millions.

FRUIT-A-TIVES A FAMOUS DOCTOR'S PRESCRIPTION

WORLD HAPPENINGS BRIEFLY TOLD

Dr. P. J. Kelly, of the University of Glasgow, announced that he would leave to take charge of a British ambulance unit in Ethiopia.

The late Lord Dalziel, prominent British newspaper publisher, left nearly £400,000 (about \$2,000,000) to the government to apply against its public debt.

The house of assembly rejected by a large majority a suggestion the Union of South Africa should remain neutral in any war not concerning her. The vote was 94-14.

Laws to strengthen Belgium's national defences soon will be introduced in parliament, Premier and Foreign Minister Paul Van Zeeland announced in a speech on the international situation.

Persistent rumors Prime Minister Mackenzie King would visit England in the immediate or near future were set at rest by his statement he would not leave Canada while parliament was in session.

Members of the Flying Clubs of Canada Association spent 13,507 hours in the air during 1935, compared to 10,581 in 1934, the association was told at the opening of its convention at Hamilton, Ont., by Secretary George M. Ross.

Air-conditioning equipment will be in operation on a number of the more heavily travelled lines of both railway companies during the coming summer, a joint statement issued by the Canadian National and Canadian Pacific Railways stated.

Building permits issued in Greater Vancouver during January this year totalled \$77,385, more than 3 1/2 times greater than the total for the corresponding month of 1935 when permits were issued for buildings valued at \$97,035.

New World Record

Hank Clemens, Of Toronto, Sets New Mark For Mile Walk

Hank Clemens, Toronto's renowned pedestrian, is the new world record-holder for the one mile walk. The Achilles club veteran stepped off the distance in six minutes 37.3 seconds at the Millrose track and field carnival in Madison Square Garden, New York, to surpass both existing marks.

He not only cracked the indoor mark of 6:37.2, set by Mike Pecora four years ago in the Garden, but surpassed the long standing world outdoor record of 6:25.8, made by the great Canadian, George Goulding, at Montreal, in 1910.

Dominion Drama Festival

Vancouver Club Chosen To Represent British Columbia

The Progressive Arts Club of Vancouver will represent British Columbia at the Dominion-Drama festival in Ottawa in April.

The Vancouver club was chosen as the coast's representative when adjudicator Allan Wade awarded them first place in the British Columbia competition for their presentation of the social drama, "Waiting for Lefty."

"Lazarus Laughed," two scenes from the play by Eugene O'Neill, presented by the Vancouver Little Theatre Association, was second choice.

Another Smuggling Trick

When a solitary barrel of olive oil arrived at Cairo, Egypt, from Palestine, the police, becoming suspicious opened it. Inside they found a little water-proof package floating in the oil. It contained nearly a pound of opium. The person who came to collect the oil has been arrested.

VICKS COUGH DROP

Secret Documents

Papers Show How Woodrow Wilson Guided U.S. Neutrality Policy

Secret documents of the U.S. state department disclosed how Woodrow Wilson personally charted the government's neutrality policy in the stirring days prior to United States' entrance into the Great War.

Page proofs of notes, letters, memoranda and other official documents which the department will publish soon include the rough outline of an early note to Germany, protesting unrestricted submarine warfare, drafted by the wartime president himself.

The draft was submitted to William Jennings Bryan, then secretary of state, April 22, 1915, as a result of the death of Leon Chester Thrasher, an American citizen, in the sinking of the British vessel Falaba March 28 in the Irish sea by German submarines.

Wilson proposed the protest should be placed on "very high grounds" and not be limited to the loss of one citizen's life.

His "decision" determining United States' policy was made soon after the first submarine sinkings, long before the decision of the League of Nations and other ships inflamed American public opinion against ruthless undersea warfare.

Movable Sidewalks

Will Carry Passengers A Mile In Four Minutes

The "biway" sidewalk, a substitute for subways, which will carry its passengers a mile in a little more than four minutes, was described in its latest form to the American Institute of Electrical Engineers at New York.

The biway is a double sidewalk, one beside the other, one which starts and stops, while its companion never stops, but loads from its intermittent companion. Norman W. Storer, of the Westinghouse Electric and Manufacturing Company of East Pittsburgh, said biways would cost less to construct and install than subways and use less power.

Storer credited Ebenezer Hawkins of Ips, L.I., with originating the biway idea in 1874.

In the latest plan the never-stop or express sidewalk, moves at an average speed of 15 miles an hour, in cycles in which its speed ranges from 12 1/2 miles an hour to 18 1/2.

With the slower speed of the express, the start-stop sidewalk synchronizes every 42 seconds, to enable passengers to get on or off the express. The express sidewalk is fitted with chains. The local sidewalk has no seats, but is fitted with handrails.

Lived Cent In Caravan

Woman 103 Had Never Spent Day In A House

Old Mrs. Honour Matthews was born in a caravan. It was her cradle, her perambulator, her carriage for 103 years, and in a caravan she died. Never in all her life did this wonderful old lady spend a day in a house. Throughout a life which began when William the Fourth was king she travelled, first with her parents and then with her showman husband, through the length and breadth of England.

Almost to her last day she could thread a needle without glasses; and when for her came the day when her eyes closed for ever, her sons and daughters were about her in the caravan.

Naval Construction

Four Powers Agree To Plan To Announce Program Each Year

The international naval conference agreed to a plan by which Great Britain, the United States, France and Italy will announce at the first of each year what their naval construction will be during the following 12 months.

The plan, offered as a compromise in an effort to limit the possibilities of a naval construction race, was the first major agreement reached by the conference in nearly three months of work.

Advertising Brings Results

Tourist advertising pays. Mr. J. D. Burton, chairman of the tourist committee, Yarmouth, Nova Scotia, says an advertisement in a New York paper brought 200 direct queries and one tourist family paid for the whole season's advertising in goods purchased at Yarmouth stores. Direct evidence of that sort cannot be thrown lightly aside.

One hundred and twenty million fish live in an average square mile of ocean.

There is no point on the earth where the moon never shines.

Why at 40 You Think You're "Growing Old"

At about 40, many people think they're "growing old." They're really a lot. Have headaches. Stomach upsets. Dizziness. Nausea.

Well, scientists say the cause, in a great many cases, is merely an acid condition of the stomach. The thing to do is simply to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, all you do is take Phillips' Milk of Magnesia after meals and before going to bed.

Try this. You'll feel like another person. Take either the familiar liquid "PHILLIPS", or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

Grain Elevators For Argentina

Huge Sum Is To Be Spent On Construction

Approximately \$22,000,000 is to be spent on the construction of grain elevators in Argentina, according to a decree issued by President Justo which approves in general the conclusion arrived at by the national committee on elevators.

The decree authorizes the ministry of agriculture to call for public bids to carry out the construction of the elevators as well as to negotiate the purchase of the existing Rosario terminal, with a capacity of 80,000 tons, now owned by a private concern, the purchasing cost being included in the total expenditure of \$4,154,000 pesos (about \$22,000,000).

In a preliminary statement issued by the ministry of agriculture covering the views of the national committee of elevators it was stated as their opinion that the construction of these elevators should be started immediately. The first stage will comprise 15 units with a total storage over 12 ports, at a maximum cost of \$5,623,000 pesos (\$18,356,000).

Palestine Regulations

Sale Of Land Must Be Made Under Certain Conditions

The Palestine government will prohibit the sale of land by owners unless they retain a certain minimum considered indispensable for livelihood, it was announced by J. H. Thomas, British secretary of state for the colonies, in a message transmitted to Arab political leaders by Sir Arthur Wauchope, Palestine high commissioner.

On the question of barring Jewish immigration, the British colonial secretary declared there could be no question of the stoppage of immigration, and that the government "does not contemplate any departure from the principle of the absorptive capacity of the country in fixing the immigration schedule."

A Russian Invention

Rubber Glider When Deflated Will Pack Into Suitcase

The latest Russian invention to advance interest in the sport of gliding is a rubber glider which, when deflated, will go into an ordinary suitcase.

The glider is a shapeless bag of rubber when removed from its case. It is spread out on the ground, a large rubber tail piece and certain stiffening parts inserted and then the rubber is inflated through various valves. Tests in the air show the device does not collapse and well obeys the control of flight.

Its weight is 92 pounds, its length 29 feet and its wingspread 30 feet. — Science Service.

The largest living non-ruminating even-toed mammal is the hippopotamus. — 2137

SUNDAY SCHOOL LESSON FEBRUARY 16

JESUS HELPS A DOUBTER

Golden text: I believe; help thou mine unbelief. Mark 9:24.
Lesson: Luke 7.
Devotional reading: Isaiah 35:5-10.

Explanations And Comments

The Doubt of John—the Baptist, Luke 7:18-20. Some of John the Baptist's disciples had remained loyal to him, and they visited him in his gloomy dungeon in the Castle of Macherus. They brought John tidings of what Jesus was doing, especially of the deeds of mercy which they either saw Jesus perform or about which they heard. John, the desert dweller, the man shut out of life, must have been in his dungeon like a caged lion. Filled with gloomy thoughts about the sad ending of his own career, hopeless of ever regaining his freedom, John was assailed by black thoughts. John thought not proving the kind of Messiah he had expected. John had looked for severity and Jesus had shown gentleness; for ruthlessness there had been mercifulness. Probably, too, John's loyal disciples expressed their doubts about the new Prophet whose ways were so different from their master's.

Jesus disappointed John because he was so little like John himself. John was the stern prophet of righteousness who preached about the axe being laid to the root of the tree and talked in stern tones about judgment to come. Small wonder that Jesus, with his ministry of sympathy and helpfulness and his emphasis upon love and service, left John wondering.

John sent two of his disciples to Jesus with the question, "Art thou he for whom we wait?"

Jesus' Message to John, Luke 7:21-23. Jesus did not then answer the question directly, but keeping John's disciples with him he let them watch him for a time. Then he bade them go back and report to John the things they had seen and heard, the marvelous cures and the marvelous words. In the wilderness Jesus refused to perform a miracle for his own sake, but throughout his ministry he healed the sick, restored sight to the blind, gave strength to palsied limbs, and cleansed lepers. He would not tempt the Lord his God by doing a mere work to wonder either for his own comfort or to gratify the curious crowds, but great needs always found forth his boundless sympathy. The power he ascribed to God: "The Father that dwelleth in me he doeth the works." By these deeds and by his preaching to the poor, by good deeds and good news, he was authenticated.

Royal graves are believed to abound on Iona Island, where, it is said, 48 Scottish, four Irish, and eight English and Norwegian kings lie buried.

"Suit" Yourself With A New Knit

PATTERN 5524

Come Spring—what's to succeed the top-coat? A knitted suit, of course, and none more serviceable or easily made than this softly tailored style whose neatly belted jacket is just plain knitting, with stripes in an easily learned contrasting stitch. Note the linked closing and crisp revers. The jacket would be smart too with a cloth skirt.

In pattern 5524 you will find complete instructions for making the suit shown in sizes 16-18 and 35-40; an illustration of it, and of all the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

MADGE TAKES A TIP...

To Make Inland Sea

Italian Engineers Are Starting Big Project In Ethiopia

An Italian engineering commission is in Asseb, Eritrea, to complete plans for creation of a "new sea." This sea will admit ships directly to the eastern Abyssinia region of Ethiopia where Francis M. Rickett and other promoters say there is

The engineers expect to let the Indian Ocean flow into Danakili's "Death Valley," which in some places lies 500 feet below sea level.

Thus they would bring Eritrean ports 100 miles nearer the interior from its southern port of Eritrea, for transportation of the thousands of tons of materials being brought from Italy to occupied Ethiopian territory.

The engineers, surveying between Massawa and Asseb, plan to dig one canal to the north and one to the south, to maintain the level of the "new sea."

They estimate two years and 1,500,000,000 lira will be required for the job, hoping the Indian Ocean's flow will widen the small, man-made canals sufficiently to admit ships to the interior waters.

The engineers expect to inundate a now worthless territory 160 miles wide and 200 miles long, transforming a large desert area into fertile regions and lowering the temperature which is now often 145 degrees Fahrenheit.

New Assault On Everest

Leader Of Party Confident Peak Will Be Reached

Bound for the "last great adventure on earth," the first members of the 1936 Mt. Everest expedition left London, en route to Darjeeling, India, for a new assault on the world's highest mountain.

Three men and one woman departed first, and the nine other members of the party followed. The woman, Mrs. Noel Humphreys, accompanied her husband, Dr. Humphreys, only as far as Darjeeling.

Hugh Rutledge, veteran leader of the 1933 expedition, again will lead the drive up the perilous snowbound heights toward the 29,000-foot pinnacle which has defied four previous attempts and has taken nine lives.

"I believe we'll make it this time," he said quietly, standing in the crowded boat train station. "With any reasonable weather, I'm confident of success."

In the 1933 attempt, Rutledge's party fought its way to within 1,000 feet of the top—only to be driven back by a monsoon which broke nearly a month ahead of schedule.

"Housework is a cure for nervous troubles," reads the latest report of the Institute of Medical Psychology, of London.

There are more than 5,000,000 motor vehicles on American farms.

Do This to Ease Sore Throat Instantly

Relieve Soreness in Three Minutes This Easy Way

1. Crush and stir 3 "Aspirin" Tablets in 3/4 glass of water.

For quickest relief from sore throat you've ever known, follow directions above.

Relief will come almost instantly. For the "Aspirin" acts like a local anesthetic to ease throat pain, and at the same time soothes irritation and soreness.

Doctors endorse this treatment. For it provides a medication, and it

DEMAND AND GET

FLEMING'S FOLLY
— BY —
LAWRENCE A. KEATING

SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Roper Klago, the boss of the Rawhide and nearby ranches, who seemed to approve the plan, but was really opposed to it, had forced Soak Torney, a derrick-minded engineer, to Klago knew would be called upon to give his expert opinion in favor of the scheme. To reverse his earlier endorsement, and declare that irrigation in Boone county so far as Hamilton's plan was concerned, was only a fancy-fangled way to waste money.

The meeting terminated, but Buzz Hamilton and his sister, Helen, Link and Klago stay behind and Helen asks Fleming questions about the irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Hunter Townsend, Link's foreman, is shot in the stomach, and Fleming is injured. Buzz is arrested.

The doctor attends Townsend and dresses his wound. Klago Roper suggests taking Helen to her home, but she refuses and Fleming escorts her home instead. This incident causes Roper to declare open hostility to Fleming.

Helen and Fleming form a partnership to provide irrigation for their own properties, and Roper, who is surprised to find Klago there ahead of him. Klago tries to induce Link to drop his scheme, but Fleming refuses, gives a signal by taking off his hat, and Link is shot at from outside the house.

Link kills Klago out of the house. Buzz Hamilton is freed from three years' imprisonment for shooting Buzz Townsend.

On his way home after the trial of Buzz was over, Link meets Soak Torney, who starts telling Fleming why he withdrew his support from the water scheme. Just as he was about to tell the name of the man who had killed him, Torney is shot and killed by a rifle bullet. Link hunts around the country for the slayer, but finds nothing. He comes across Jackpot Mell watering his horse, and

Fewer, Shorter Colds for Those Trying Vicks Plan

Worth of Plan for Better Home-Control of Colds Shown in Tests Among 14,703 People

FURTHER PROVED IN HOME USE

Convincing results—in fewer, milder and shorter colds for those following this home guide—have been obtained from clinical tests of Vicks Plan for Better Control of Colds. These tests included 14,703 people, and the Plan has been further proved in everyday home use throughout the country.

Vicks Plan is the practical result of 30 years' specialized study of colds by Vicks Chemists and Medical Consultants. It is based on just three simple steps:

1. To Help Build Resistance to Colds. Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds since or near use, use VapoRub. At the first warning nasal irritation, just a few drops of each nostril. VapoRub is especially designed for the nose and upper throat—where most colds start. Used in time, VapoRub helps to prevent colds and to throw off head colds in the early stages.

3. To Help End a Cold Sooner. If a cold has developed, or strikes without warning, rub throat and chest with bedtime VapoRub. VapoRub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster. (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, helps break congestion.

What this commonsense, medically sound Plan can do for you and your family can be proved only by trying it. You'll find full directions for following Vicks Plan in any package of Vicks VapoRub or Vicks VapoBalm.

2. Gargle thoroughly—throw your head way back, allowing a little to trickle down your throat. Do this twice. Do not rinse mouth.

takes medicine to combat a sore throat. Try it. Results will amaze you.

Aspirin Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

"ASPIRIN"

CHAPTER VI.—Continued

(Now Go On With The Story)

"You bet!" Bush warned earnestly.

"From now till I see water backed up in that dam—if you build one and if it really works—I wouldn't trust a soul if I was in your boots, Link. But say," he added, as both men swerved their horses to depart, "if things get real tough, we both got smoke-irons that usually work when we pull the trigger. We think you're all wrong and foolhardy too—but remember that anyhow. So long, Link!"

He watched them out of sight in the darkness. Then shrugging his shoulders, he rode for the ranch house. Mention of the dam had reminded him of the plans drawn by Soak Torney for the country-wide irrigation. He wanted to re-examine them to learn whether they could be modified to suit his altered purpose.

When he entered the ranch house he was to find the place cold and lonely. Link set to work to build a fire in the squat, long-unused iron stove. He fumbled for a match but found none. Turning to the small kitchen, he spied the roll of blueprints, and at once his attention swerved. He spread them out on the slab table, holding them down with his hands while he began to study them.

Torney had planned a large dam to be built where Link's property adjoined that of Benson, the small rancher from Klago. In a wedge shape between the Triple It came in just at this point. "Would it be possible for Link and Helen to construct a smaller dam upstream that would suffice for their two spreads?"

Poring over the prints, he became convinced that such a change could be made. That chap, Tom McLennan, if he could be lured to Rawhide, could revise these drawings. And if he could complete a cut-off for Silver Creek before heavy snows came, it might be possible also to get in the foundation before winter set in. This cold spell, he knew, was but temporary. If the project could be hurried there was promise of a mid-summer crop of alfalfa to sell their skeptical neighbors!

The Star Loop owner roused from his immersion in thought of the scheme to realize that he had not yet started a fire in the stove. Going again to the kitchen, he returned with several matches in his hand. He approached the open stove and stuck one on his foot, then tossed it into the thin pine shavings took eager light. Link closed the door and turned back to the plans.

That was the last he knew. For with the suddenness of a thunder-clap in the reverberating hills, the entire ranch house seemed to burst into flame. There was a terrific roar. The very walls seemed to swell outward, and with force and concussion he felt them against the far wall, the iron stove burst into bits as an explosion rocked the room.

CHAPTER VII.

The red glow of the burning ranch house was visible several miles over the prairie. Like a shaft of crimson the fire rose higher and higher, cracking in malicious glee as it devoured under-dry clab-boarded floors. Horses trotted whinnying toward the far end of the corral to huddle there with ears laid back, their tawny bodies reddened against the bars.

The shock had awakened Sime Halby, by chance the only Star Loop owner whose house was not over the prairie. Like a shaft of crimson the fire rose higher and higher, cracking in malicious glee as it devoured under-dry clab-boarded floors. Horses trotted whinnying toward the far end of the corral to huddle there with ears laid back, their tawny bodies reddened against the bars.

Shaken from his bunk by the terrific jar, he landed on his feet, dazed and startled. Seizing a gun, he rushed from the low bunkhouse—to

stop agast. His watery grey eyes went round. His cavernous jaw slackened, and for once Halby forgot to tug at his ear. Veteran of many Western accidents, he reasoned instantly that someone must be inside the ranch house, hence the explosion.

Already the fire gaped hungrily toward the roof. Sime dashed to the rear barrel, found a thin skimming of ice on it and broke it with a hard fist. He splashed the chill water over his clothing in a swift effort to soak himself. Then without hesitation he rushed to the front door of the house, and shading his eyes from the fearful heat, peered inside, for sign of his employer.

Face-down and utterly unconscious, Link sprawled in the track of the fire that gnawed into dry flooring. Halby sprang to his side. Kneeling, he pulled the rancher's arm around his neck. Then he grasped Fleming's knees and started outside with his burden.

Once he stumbled and almost dropped his employer. Somehow he kept on through licking tongues of fire that made the clothes of both men smoke as though any instant they would burst alive with flame. The sharp night wind struck them like a blow, its smart and sting painful to their scorched faces.

Link moaned. "Hang on!" Sime numbed, coughing from the heavy smoke. As he reached the corral and sank exhausted beside the juniper rails, hoofbeats sounded nearer. A man swept around the curve of the enclosure, and another, Waco Byrne hit the ground and came running. "Link! Say, is he dead?"

Halby was in another spell of coughing. He shook his head. At last he spoke. "His knees."

"Eh," he stung at Tasker, his companion, "get Sime in the bunkhouse. Pour some liquor in him. There's bare grease for his burns in a can on the shelf; it's the best thing there is."

He squinted at Fleming, then placed his ear close to his lips. "Breathe!" all right. What the tarnation hooligans made the hull hebang go like that?"

Tasker was draping his fellow-waddler over his shoulder like a bag of flour. "Think the other bulldin'll catch?"

"We can't do anything about it now. The wind is changin', though. Sime's tendin' those hombies; there be folks arrivin' soon. Always gather fast to celebrate bad luck."

He carried Link inside the bunkhouse and carefully deposited him on a straw-filled mattress. When Tasker had applied whisky to Sime, and the gagging veteran had begun to curse angrily, Byrne forced some of the spirits between his employer's lips. Link sighed and fluttered his eyelids. Deftly the acting foreman applied bare grease to his face, neck and arms, and then, as his shirt was ripped from his torso, exposing a long gash across his chest where broken glass from a window had cut as he hurried into it. There was a rapidly swelling lump on his forehead and a score of minor bruises and cuts.

Hoarse shouts outside told Byrne that other Star Loop riders had come at a gallop. Little could be done, however, to form a bucket brigade from the spring was already worse than useless. Waco stepped to the door and cupped his palms.

"Soak under the other roofs, boys! Get the tools out o' that shed in case she goes!"

By now the house was almost entirely destroyed, and while Byrne watched a wall toppled in. His face took on a hard look. When he turned back Halby was on his feet, swearing and demanding his gun.

"I'm gonna kill somebody for this!" he yelled. "I'm gonna kill the first lowdown—"

"Shut up and tell me what happened."

Sime gulped. "What happened? Yuh knowed, there was a helluva explosion! I—er, woke up stagin' here in the middle of the floor. Thought it was Judgment Day for shore. Must have dropped off in a daze or somethin'," he added, guiltily. "I just came in to change my boots 'case one burst."

A quick footstep and a low cry made them both whirl. "Link!" Helen Hamilton stood tense with worry, one hand clasped to her throat. "Where he he?"

Waco squinted through the dim light of the oil lamp. With an exclamation, he indicated the bunk on his left.

She ran to it, her oval face pale with trepidation. As she leaned over him Fleming opened his eyes. He tried to smile, but the pain of his burns and the fact that his eyebrows had been singed off gave him a gruesome look.

"I'm—all right," he managed to gasp between spasms of coughing. Then struck by a third fire, he rushed on one elbow. "The plans!" 2137

"Plans?" She stared, not comprehending at once. Then she flew out of the bunkhouse.

"Take it easy, Link. I'm sending one of the boys for Doc Slater. I'll finish dressin' them cuts right off," Byrne promised.

When Helen returned her steps were slow with discouragement, her shoulders drooping. Hesitance was in her brown eyes—as, filled with pain, they met those of the Star Loop owner. No words passed between them for a moment; then Link sighed and lay back.

"Gosh," he muttered dully.

She strove to swallow the lump in her throat. "Roper and I heard about Soak Torney being shot. Of course I knew you hadn't done it, and I tried to stop the talk in town. Now the plans are burned."

There was a short silence during which Waco tiptoed out of the cabin. "Gosh!" he muttered to himself. "That look she gave me was worth gettin' burned for!"

"It means we can't start the dam this fall. And next spring it will be harder than ever to finance. It means hiring extra men, for we won't be able to spare any from our steers. There's the cost of new plans, too, and the loss of the alfalfa we'd have."

"The girl stopped. 'How did this happen, Link?'"

He told her as much as he knew. "I tossed a match in the stove and waited to see the pine shavings catch. Then I closed the door and stepped back to the plan again. Had them spread out on the table. It looked pretty plain that we could alter Torney's work a little and build our dam upstream. All the directions were there how the job should be done."

He scowled past her, toward the door. "Why should a stove blow up like that? The pipe was open. There must have been dynamite in it, Helen."

"Dynamite!" A shudder racked her lissome figure. "Oh Link, I was—I was afraid you—"

"Mr. Lincoln Fleming. Esquire, here?"

(To Be Continued)

Humans Developing Fast

Our Descendants Will Withstand Superhuman Endurance Tests

The human race is developing faster than it ever did, in the opinion of Dr. Ales Hrdlicka, curator of anthropology at the Smithsonian Institution, Washington.

Dr. Hrdlicka, quoted by the American Magazine, says our descendants will be taller than we are, handsomer and better brains. They may even lose their fifth toes. Most will come through human tests of endurance.

Dr. Hrdlicka has spent 39 of his 66 years studying hundreds of thousands of living and dead human beings from the Ice Age up to now. Six months of each year he spends digging up skeletons. To-day he wonders if some scientists will dig up his skeleton in 6,000 A.D. and call him a primitive man.

Woman's Ailments

Mechanical Ears

New Method Of Piloting A Plane By Sound Alone

Mechanical ears for piloting a plane by sound alone, an entirely new principle in aviation, were described to the Institute of Aeronautical Sciences, Luis De Florez, of the De Florez Engineering Company, of New York, who has spent three years developing them and flown many hours blindfolded, gave a "ground demonstration" with the instruments.

"It is possible," Florez said, "that a blind man, with his more accurately timed hearing, might become a better pilot than one who can see."

All "blind" flying heretofore has been done with the eyes, watching instrument boards. But with "mechanical ears" the pilot flies wholly by listening to a pair of ear phones. He can use them in fog, clouds, darkness, on any kind of plane.

The phones are connected with a tiny propeller, set far out on the leading edge of one wing. This propeller is the size of a toy pin wheel. Like the toy, it changes speed with acceleration of the plane. It runs faster if the plane dips, slower if it ascends, steady if level. The propeller drives a little generator. This generator hums in the pilot's ears.

Its note grows shriller for dip, lower for ascent, tells him whether the plane is level. It tells him quicker than the eye could do the same thing. For the electric current is amplified, so that a slight deviation shrieks its warning.

In the phone circuit there is a small gyroscope, set to indicate the slightest turn of the ship to left or right. If the plane turns, this gyro cuts off one ear phone.

The pilot then knows he is starting to turn toward the side on which he still hears the hum. Here, too, the sound warning can be quicker than the eye.

Little Helps For This Week

Stand fast therefore in the liberty wherewith Christ hath made us free, and be not entangled again with the yoke of bondage. Galatians 5:1.

They are slaves who fear to speak.

For the fallen and the weak: They are slaves who will not choose.

Hated, scolding and abuse. Rather than in silence shrink From the truth they needs must think;

They are slaves who dare not be in the right with two or three.

The real corrupters of society may be, not the corrupt, but those who have held back the righteous leaven, the salt that has lost its savor, the innocent who have not the moral courage to show what they think of effrontery or impunity, the serious who yet timidly succumb before some loud-voiced scuffer, the heart trembling all over with religious sensibilities that yet suffers through false shame to be beaten down into outward and practical acquiescence by some rude and worldly nature.

An Unusual Accident

Stallie In Cat's Fur Causes Explosion In Gas Chamber

Inspector H. C. McDonald of Hamilton, Ont., was the victim of burns and shock from a remarkable sequence of events—a cat, a gas chamber and static electricity.

The inspector took a stray cat to the gas chamber at the city pound. The cat objected, squirming in a lively manner as McDonald thrust it into the gas. Friction in the fur created static electricity.

There was a bang. McDonald recovered consciousness—on his back, his clothing blown or burned from his body. The chamber was knocked to pieces. The cat hasn't been seen since.

Many Applications Received

More than 5,000 applications were received up to January 31 under the Federal Prairie Farm Rehabilitation Act, by the Dominion water development committee at Swift Current. The committee is interested in approving applications for the construction of small dams, dug-outs, reservoirs and irrigation projects in the prairie provinces.

"Who is your baby really like?"

The 65th Annual Statement of the SUN LIFE ASSURANCE COMPANY OF CANADA

Reflects the Strength and Stability
of Life Assurance

A voluntary co-operative enterprise which for generations
has stood every test

HIGHLIGHTS OF 1935

ASSURANCES IN FORCE . . . Exceed Two Billion Seven Hundred Million Dollars. This is the amount which will be paid by the Sun Life as the policies now in force reach maturity. By thrift and foresight more than a million policyholders have provided, through Sun Life policies, for the support of their families in case of premature death and their own independence should they live to old age.

NEW ASSURANCES PAID FOR . . . Exceed Two Hundred Million Dollars for the year. During 1935 more than seventy thousand persons established estates by purchasing Sun Life policies, thus providing security for many thousands of homes.

POLICYHOLDERS AND BENEFICIARIES . . . Benefits amounting to Eighty Million Dollars were paid out—over Two Hundred and Eighty-five Thousand Dollars for each working day. Since the Sun Life commenced business 65 years ago it has paid out to policyholders and beneficiaries well over Nine Hundred Million Dollars.

ASSETS . . . Of over Seven Hundred Million Dollars ensure that every Sun Life policy will be settled promptly when the time for payment arrives. In the meantime, this fund invested on behalf of policyholders, contributes notably to national and industrial progress.

SUMMARY OF DIRECTORS' REPORT

ASSURANCES IN FORCE, December 31, 1935	\$2,736,900,000
NEW ASSURANCES PAID FOR	\$19,076,000
INCOME	\$13,406,000
DISBURSEMENTS	\$106,173,000
EXCESS OF INCOME OVER DISBURSEMENTS	\$7,831,000
PAYMENTS TO POLICYHOLDERS AND BENEFICIARIES	\$80,384,000
During the year 1935	\$68,814,000
Since Organization	\$95,690,000
ASSETS	\$707,098,000
LIABILITIES	\$695,690,000
PAID-UP CAPITAL (\$2,000,000 and balance at credit of shareholders' account)	\$3,381,000
RESERVE for depreciation in mortgages and real estate	\$3,301,000
SURPLUS	\$14,422,000

The valuation of the assets has been made in accordance with the basis adopted by the Insurance Department of the Dominion of Canada

COMPANY OF CANADA**

C.J. Tompkins
Crow's Nest Pass Agent
BLAIRMORE - ALBERTA

Local hotels have been fairly well filled to capacity during the past week of extreme cold weather. Auto travel has not been so very pleasant.

Since the installation of the shower baths at the central school building, at great cost to the ratepayers, the register does not contain the name of one person who has made use of them. That's good business, isn't it?

J. S. D'Appollonia, well known Coleman building contractor, has purchased a piece of land from the C.P.R., opposite Sam's Service Station, Coleman, on which he will erect an office building and buildings to house his lumber stocks. Work will be commenced in the spring.

About twenty carloads of rabbits have been shipped from the Rocky Mountain House district to fox farms in New Brunswick this season.

Blairmore took decisive defeat from the hands of Lethbridge Maple Leafs in the opener of the playdowns. At Lethbridge on Saturday night, the Bearcats took the small end of a 4-2 tally, and here on Monday again suffered to the tune of only one to eight.

Mary, wife of Walter Klis, passed away suddenly on Monday. She is survived by her husband and three small children. The remains were laid to rest in the Union cemetery on Wednesday afternoon, following a Communist service held in the local community hall.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, local, etc. Please name in by 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Samuel Patterson this week celebrates his 44th birthday.

1935 license plates will not be tolerated after Saturday.

Mrs. J. Misson and children are spending a few days in Bellevue.

John Fleetwood, secretary-treasurer of the Lethbridge school board, died Tuesday morning, aged 77.

"Voo-oo-oo!" remarked Joe Kubik when he stepped out into the 48-below atmosphere.

The town of Clarendon closed the year 1935 with a financial surplus of \$8,000.

Dr. J. S. Hynes, returning from a visit of a few weeks to California points, passed through Blairmore on Thursday last, enroute home to Clarendon.

Jack Eddy, who was a recent guest of a local dentist, dreamt about his missing molars a few night ago, and was heard singing loudly in his sleep: "I wonder who's wearin' 'em now." A number of sympathizers joined heartily in the chorus.

A resident of Passburg district appeared before court here on Monday charged with leaving a horse, or team, standing tied to a post at Hillcrest for a length of time sufficient to be considered cruel. He pleaded guilty and was fined ten bucks and costs, in all about \$17.00. He paid the fine.

Plans are being arranged for the building of a sister ship to the Queen Mary. There'll be no more necessity of spending four days on the rough Atlantic. The two ships will be placed end to end and span the pond from Ireland to Newfoundland. Then the world's speediest train will travel over them, making the run across in less than 30 hours. Honestly, you'd have to be darn good and drunk to ever think of seasickness!

If there is any town in Canada that really didn't need a park, it was Blairmore. All round our town are myriads of the most beautiful natural parks, and it is interesting to note that very few people living in the town take any interest in them. In the summer time, people from the prairies come to the mountains for their picnics and outings, mainly to get to where trees are, while people from the mountains will journey prairiewards and choose the most unsightly locations.

Mr. and Mrs. Hall, senior, and Mr. and Mrs. Sam Hall left Cowley Saturday evening for Michel, owing to the sudden death of Findlay Hall. Tragedy seems to have been dogging the Hall family, for Mrs. Hall's nephew, his wife and six children were recently burned to death in the Old Country. On Saturday morning Mrs. Sam Hall received a wire telling of the death of her brother in Kimberley. Later in the day they had a phone call from Michel, informing them of the sudden death through heart failure of Mr. Hall's brother.

AN OPEN LETTER TO MAYOR KNIGHT (In answer to his letter to the "Calgary Herald")

The mayor Knight goes forth to fight, and spreads his views abroad. The pen, thinks he, quite gallantly, is mightier than the sword! Launched his attack with no wise-crack in contemporary column, Preserving all his iron will and utterance most solemn.

The challenge hurled—"I'll tell the world"—to city editors; His trumpet-squeals a tense appeal to social creditors. His first demand, a tract of land, for all against him voting. To reap and sow, and plow and mow, to make them self supporting.

Bill Aberhart should give a start, and all encouragement; And even lend the "dividend" to curb disparagement. Give them "free rent" (or was it "rain") the worker's life to ease—The Knight has made a bad crusade by comments such as these.

He now offends his erstwhile "friends," who hold him in subjection; Forgets the day they gave him away in mayoral election. The job he sought—for which he fought—was not a bed of roses. He finds himself now on the shelf, and "tactics" now exposes.

And you who dare, are you prepared to practise what you preach? Your own townsmen will turn again and will yourself impeach. Then keep your alms—your note infers a slam against the workers. They have a mind, and soon you'll find they're not a bunch of shirkers!

—GONGA DIN.

Mr. and Mrs. Gordon Steeves were visitors to Calgary last week.

Joe Misson has invested in a taxi-deluxe.

The Corona hotel at Grande Prairie was destroyed by fire yesterday.

Coleman Elks will observe St. Patrick's Day by holding a grand dance in the community hall.

Local candidates in the Imperial broadcast journeyed to Lethbridge yesterday for competition.

Mr. A. Patterson, of Calgary, customs inspector, was a visitor to Blairmore on Tuesday and Wednesday on official business at the local office.

Sergt. J. Frewin, formerly of Nanton, has been transferred to Moncton, N.B., and not Fredericton as previously announced.

In the municipal elections at Coleman on Monday, W. H. Haysom, Fred Antrobus and James M. Allan were elected to the town council. Allan is a new member, Haysom and Antrobus have served previously.

The members of Crow's Nest Chapter of the I.O.G.E. attended the evening service at the United church on Sunday last. Special music was provided, and a sermon in keeping with the occasion was delivered by the pastor, Rev. A. E. Larke.

Mrs. Galliot left by Saturday night's train for Vancouver, where she will consult a specialist and likely undergo an operation. To make the trip and treatment possible, the thanks of the family are accorded those friends in Coleman, Bellevue, Hillcrest, Frank and Blairmore, who so kindly contributed to the necessary funds. Five times previously Mrs. Galliot has occupied the operating table.

Frank Winters & Co. have purchased the general mercantile business of S. A. Speers at Creston. Frank was formerly in business at Corbin and Banff. He was with the Triton-Wood Co. at Fernie following 1910, then manager of the Natal Trading Co., later travelling for the Scott Fruit Co. between Fernie and Pincher Creek. In 1929 he took charge of the Flathead Trading Company's store at Corbin, remaining there until the mines closed.

After a hot ratepayers' meeting at Blairmore last Friday night, during which Mayor Bill Knight was pulled from the platform, but climbed back and finished his speech, a meeting of citizens selected a slate for councilors and school trustees which was elected by acclamation on Monday. The mayor offered to resign and run for re-election, if the three hold-over Communist councillors would do the same. After gaining a national reputation as the Communist mayor of Blairmore, it now appears that Knight gave the world plenty of reasons for supposing that he was a Communist, and for wondering what has happened behind the curtains. —MacLeod Gazette.
